EDUCATION

University of Toronto

Honours Bachelor of Science: Statistics Specialist

Sept 2025 – Present

EXPERIENCE

Software Development Intern – GE Appraisal Consultant Service

May 2026 – Present

REST APIs, Authentication, Row Level Security, CI/CD, Cloud Storage, Geocoding

- Designed and built a full-stack property appraisal management tool using React, Supabase, and Leaflet.js, deployed on Vercel
- Implemented secure authentication with Row Level Security, private cloud storage with signed URLs, and role-based access control for internal staff
- Built interactive map interface with geocoded property pins, autocomplete search, and document management (PDF and folder uploads)
- Managed the full development lifecycle from requirements gathering to deployment, including database design, third-party API integration, and CI/CD via GitHub and Vercel

PROJECTS

Counter Strike Arbitrage Trading System

Jan 2026 – Present

Python, REST APIs, Multithreading, Cloud Infrastructure, Git

(Live, Production)

- Engineered a Python algorithmic trading bot that proxies **10M+ market** variants through 150 anchor listings, autonomously placing thousands of competitive buy orders to generate \$1,000+ profit at 80%+ ROI with a 99%-win rate.
- Built adaptive bidding logic with minimum-increment auto-outbidding, capital-efficient underbidding, max-bid enforcement, bait-removal protection, and bid-war escalation that gradually steps toward ceiling bids instead of overreacting to competitors.
- Designed a dynamic hot/mid/cold listing tier and resilient state-management system with atomic state.json writes that reduced average runtime by over **93%** from 50 minutes to 3.3 minutes, stale order cleanup, safe listing rewrites, rollback-protected tier moves, cooldown persistence, watchdog exits, and hard max-bid guards, reducing wasted API calls while improving response speed on profitable opportunities.
- Integrated production observability with Discord alerts, full run logs, price-change summaries, automated PnL tracking, multi-marketplace scraping, and cron-triggered GitHub Actions deployment.

ADDITIONAL EXPERIENCE

Digital Content Creator — YouTube / Social Media

July 2023 – Present

- Generated \$20K+ USD in revenue through the YouTube Partner Program (YPP), sponsorships, and brand deals
- Analyzed audience retention and viewer activity data to optimize posting schedules and video formats, scaling to 140M+ views and 290K+ followers across platforms
- Performed content performance analysis on viral videos to identify replicable growth patterns, informing future production decisions

Math Tutor — Kwiki (UofT × Khan Academy Partnership)

Jan 2026 – Present

- Provided one-on-one mathematics tutoring, reinforcing structured problem-solving and analytical thinking

SKILLS

Programs: Python, Java, JavaScript, SQL, R

Frame Works: React, Leaflet.js, Supabase, Node.js

Systems: REST APIs, Multithreading, Cloud Infrastructure (DigitalOcean), CI/CD, Git, Vercel, PostgreSQL

Data: Pandas, JSON, Regex
