EDUCATION

University of Toronto

Honours Bachelor of Science: Statistics Specialist

Sept 2025 – Present

EXPERIENCE

Software Developer – GE Appraisal Consultant Service

May 2026 – Present

React, Supabase, PostgreSQL, Leaflet.js, Vercel

- Designed and deployed a full-stack property appraisal platform that centralizes property records, documents, and location data in an interactive map for internal staff.
- Built geocoded property pins, autocomplete search, and PDF and folder-management workflows, reducing the need for employees to search across scattered sources for appraisal information.
- Owned delivery from staff requirements through production deployment, securing internal data with Supabase authentication, PostgreSQL Row Level Security, role-based access control, and signed URLs.

PROJECTS

CS2 Marketplace Automation Platform

Jan 2026 – Present

Python, REST APIs, GitHub Actions, DigitalOcean, Discord Webhooks

(Live, Production)

- Built and operated an end-to-end marketplace automation platform managing 150+ market targets, from adaptive buy-order repricing through inventory relisting and confirmed-sale logging, generating \$2,000+ in realized profit at 80%+ ROI.
- Reduced average runtime by 93%, from 50 minutes to 3.3 minutes, by introducing activity-based hot/mid/cold scheduling, persisted cooldowns, and more efficient API usage.
- Engineered adaptive bidding and production safeguards including bounded bid limits, atomic state persistence, rollback-protected updates, watchdog exits, GitHub Actions workflows, and Discord monitoring.

Marketplace Price Comparison Engine

June 2026 – Present

Python, SQLite, Playwright, REST APIs, unittest

- Built a modular Python pipeline that scans marketplace inventory, retrieves exact-match Steam prices, and ranks listings by cross-market price ratio.
- Designed a resilient pricing system with SQLite caching, resumable pagination, request pacing, exponential backoff, stale-cache recovery, and fallback price providers.
- Automated CSV, JSON, Markdown, and Discord reporting; wrote 50 automated tests covering adapters, caching, authentication, ranking, exports, and provider fallbacks.

ADDITIONAL EXPERIENCE

Digital Content Creator — YouTube / Social Media

July 2023 – Present

- Generated \$20K+ USD through the YouTube Partner Program, sponsorships, and brand partnerships.
- Analyzed audience retention, viewer activity, and content performance to scale channels to 140M+ views and 290K+ followers across platforms.

Math Tutor — Kwiki (UofT × Khan Academy Partnership)

Jan 2026 – Present

- Provide one-on-one mathematics tutoring, adapting explanations to reinforce structured problem-solving and analytical thinking.

SKILLS

Languages: Python, JavaScript, Java, SQL, R

Frameworks/Libraries: React, Flask, Node.js, Pandas, Leaflet.js, Playwright

Tools/Platforms: Git, GitHub Actions, Supabase, PostgreSQL, SQLite, Vercel, DigitalOcean

Concepts: REST APIs, CI/CD, Authentication, Web Scraping, Browser Automation, Multithreading
